

Bug Report										
Bug ID	Summary	Sevirty	Priority	Date Reported	Reported By	Description	Expected Result	Actual Result	Steps to Reproduce	Attachments / Screenshots
BUG_001	Unsupported file format upload fails silently without error message	High	High	20.09.2024	Maneesha	When users try to upload an unsupported file format (e.g., .bmp), the upload fails silently without displaying an error message.	The system should display an error message stating that the file format is unsupported.	No error message is displayed, and the upload fails silently.	Go to the profile page. Click "Upload Profile Picture". Upload an unsupported file format like .bmp.	
BUG_002	No guidelines for file format or size on the upload interface	Medium	Medium	20.09.2024	Maneesha	The profile picture upload interface does not provide any information or guidelines regarding the allowed file formats or maximum file size.	The system should display guidelines on the allowed file formats (.jpg, .png, .gif) and maximum file size (5MB).	No guidelines are provided on the upload interface, leading to user confusion.	Go to the profile page. Observe the upload interface. Attachments / Screenshots: Screenshot of the upload interface showing no guidelines.	
BUG_003	Uploaded image does not appear immediately in the profile preview	Low	Medium	20.09.2024	Maneesha	After successfully uploading a profile picture, the new image does not appear in the profile preview section immediately. Users need to refresh the page to see the updated image.	The uploaded image should appear immediately in the profile preview without needing to refresh the page.	The profile preview still shows the old image until the page is manually refreshed.	Go to the profile page. Upload a valid profile picture. Observe the profile preview section	
BUG_004	Successful image upload fails after a previous failed upload attempt	High	High	20.09.2024	Maneesha	After a failed profile picture upload attempt (due to file size or format), the system does not allow subsequent valid image uploads until the page is refreshed.	The system should allow valid image uploads after a failed attempt without refreshing the page.	Subsequent valid uploads fail until the page is refreshed.	Go to the profile page. Attempt to upload a file larger than 5MB or an unsupported format. After failure, try uploading a valid image (e.g., .jpg).	
BUG_005	Error message for file size exceeds limit is unclear	Medium	High	20.09.2024	Maneesha	When users upload a profile picture larger than 5MB, the error message is generic and does not specify the file size limit.	The error message should inform users of the maximum file size limit (e.g., "File size exceeds 5MB limit").	A generic error message is displayed, leaving users unaware of the size restriction. Steps to Reproduce	Navigate to the profile page. Click on "Upload Profile Picture". Attempt to upload a file larger than 5MB. Attachments / Screenshots: Screenshot of the unclear error message.
